SYMBOL GUIDE
This helpful symbol guide will help you choose the right hi vis and apparel for you and your team.

Garment tested & certified to Temporary Traffic Management Control - Wet (TTMC-W) code of practice.

Design tested & certified to: AS/NZS 4602:1.2.2011 Class D: N. Suitable for Day/Night time use.

Fabric tested & certified to: AS/NZS 1906.4.2010.

These garments comply to Ultraviolet Protection factor with: AS/NZS 4399. Orange fabric complies to AS/NZS 4399 UPF of 50+. Exceed protection.

Tested and certified by independent testing laboratory. We do things properly to give you the confidence needed to use our garments.

Garments that use UltraFlect® Retro-Reflective Tape are designed to offer the highest visibility in every situation! This UltraFlect® tape exceeds all of the relevant requirements of the European and Australian/New Zealand standards for Day/Night use.

UltraFlect® Stretch tape is the only independently tested and certified retro-reflective stretch tape on the market! The tape enhances the ability of the wearer to reach and move, by stretching to allow greater flexibility and ease of movement, and is suited for the harsh industrial laundries.

Long tail for extra visibility when bending or crouching down increasing the safety of the wearer.

Venting System - Vents under the arm help the garment and wearer keep cool.

Sports Mesh Venting System - Sports mesh ventilation panels giving amazing comfort and allowing the garment to breath whilst warm.

VentYou System - Cotton mesh ventilation and venting systems providing day long freshness whilst still maintaining the durability and strength of the shirt.

Cotton Backed Polo - Comfortable, odourless, and ventilated with Microfibre cotton backing for superior comfort.

Quick dry - Quik Dri Microfibre fabric draws body perspiration away quickly allowing the garment to dry quickly and keep the wearer cooler.

Lightweight Garments - These lightweight garments help to keep you cooler, so you can work longer with less fatigue and less dehydration.

Lightweight Cotton Backed Polo - Made with 145gsm lightweight cotton-backed Microfibre fabric reducing the weight and reduces fatigue.

Lightweight Cotton Backed Polo - Made with 145gsm lightweight cotton-backed Microfibre fabric reducing the weight and reduces fatigue.

Suave Fabric - An extremely soft and comfortable fabric with the endurance and hardness you need, exceeding the highest colour fastness and wash standards. We use a 190gsm 100% cotton 3/1 drill with this industrial shirt range for all day comfort and wear in the most exposed jobs.

Ripstop fabric - A woven, lightweight material that has a superior resistance to tearing and ripping. Ripstop is made by weaving threads throughout a base material in interlocking patterns, with the crosshatched threads giving the material an exceptional tear resistance.

EnduraLite fabric - This hard-wearing sturdy material is an extremely tough and durable textile, giving it the functionality yet longevity. Oxford weave fabric offers exceptional abrasion resistance in high wear areas.

Tough Crutch - Research has shown that the key failure point on lightweight garments is in the crutch area. With this in mind, we have reinforced our 7622 trousers with the EnduraLite Tough Crutch®. The EnduraLite fabric insert is re-added here, coupled with the strength of our high tensile thread, give you the confidence and comfort you would expect from a lightweight trouser.

Tough Scuff - We’ve used our EnduraLite fabric, insert at the bottom of the trouser to ensure the Titan’s long life and no fraying edges.

Smartphone/Phone Pocket - Phone pocket to ensure you stay connected while at work.

Designer Style - Designer collar for a classy, refined look, with contrast fabric to reduce visible dirt and grime and help keep your team looking sharper for longer.
POLO FABRIC AND VENTING SYSTEM

THE MOST COMFORTABLE ODOURLESS COTTON BACK POLO

Lightweight fabric made from 145gsm Microfibre with a 100% cotton backing. Argyle moisture wicking comfort through high filament fibre technology. This micro-construction causes the yarns to bulk up when exposed to moisture and quickly dry when exposed to air.

• Wicking technology
• Diffusion ability
• Drying ability
• Moisture control
• Superior odour control

Lightweight, highly breathable with underside vents going from under the arm and right down the side of the polo as well as a large panel vent on back all the way down to the hem. Sports mesh ventilation panels are extremely soft and comfortable against the skin. The wicking and quick-dry properties help to create superior odour control.
TWZ VENTYOU SYSTEM

Cotton mesh ventilation and venting systems providing day-long freshness. Ventilation panels on back, and mesh underarm ventilation. Still maintains the durability and strength of the shirt.

Day-long freshness!
COMFORT AND OUR ULTRAFLECT STRETCH TAPE

FOR BETTER STRETCH, MOVEMENT AND COMFORT

Argyle Performance Workwear is the first to use UltraFlect® Stretch tape - the only independently tested and certified retro-reflective stretch tape on the market! This stretch tape has proven to be a superior reflective tape. The tape enhances the ability of the wearer to reach and move, by stretching to allow greater flexibility and ease of movement. This ensures greater comfort for all wearers.
MAXIMUM UV PROTECTION

STAY PROTECTED FROM THE SUN

Our high-visibility garments are not just cool and comfortable to work in. They also have an extremely good ability to transport moisture away from the body, a built-in UPF of 50+ (applies to orange fabric) and extra-stretchy reflectors.
CERTIFIED COMPLIANCE

OUR COMPLIANCE IS CERTIFIED

Any product that we state is compliant to a standard is backed with the relevant certification. This is so you and your clients are covered should there be a workplace incident that requires you to prove that the garments are compliant. You are able to request certification for any of our garments as required by simply emailing your request to sales@argyleperformanceworkwear.com.

**SHIRT**

**TWZ 170gsm Polycotton Contrast Long Sleeve Shirt**

**Code:** LC0108  
**Colour:** Royal/Black, Red/Black & Grey/Black  
**Sizes:** S-4XL

**DETAILS:** VentYou System - Cotton mesh ventilation and venting systems providing day long freshness whilst still maintaining the durability and strength of the shirt.  
- Two chest pockets with pen partition  
- Concealed domed placket front  
- Easy care wrinkle free finish  
- Mercerised: Yarns are spun with less twist than ordinary yarn to increase the lustre of the fabric. The mercerising process increases the strength of the yarn by about 30% and decreases the weight by about 5%.  
- Sanforised: Treating the fabric during finishing gives garments a shrink resistant finish.

**WASH AND CARE INSTRUCTIONS**

For lasting function and durability!

The correct wash cycle, care and storage of your workwear is important for its longevity, function and ongoing comfort. The right care is also conditional in order to guarantee specific functions in the garment. An example is that a Hi-Vis garment may be less effective and therefore, less safe if it's dirty. Please read and become familiar with the following care and washing instructions.

**WASH**

Every product has specific washing instructions, which it is important to follow. They are suited to the particular garment's material and design. Where the washing instructions say “wash separately”, this should be done. Alternatively, the garment can be washed with similar colours. We at Argyle Performance Workwear estimate that woven materials will shrink up to 3% and knitted material/jerseys up to 5%. Avoid shrinking by ironing your clothes after washing them. Certain clothes may need to be shaped somewhat to retain their form. When we say ‘shaped’ we mean, you may need to hang dry them on a shaped hanger or lie them flat in their natural shape to dry. It is also important that zips, buttons and Velcro closures are closed when the garment is washed. This reduces wear and tear on them and lengthens the garment’s life.

**PRE-WASH**

The garments do not normally need pre-washing. In case of heavy soiling, pre-wash can be used, with the same quantity of detergent as used in the main wash. Do not soak the wash in advance as undissolved detergent can damage garments.

**DETERGENT**

Use laundry detergent for coloured garments. Do not use laundry detergent containing bleach. Check that the laundry detergent is intended for the garment’s wash temperature. Follow the washing instructions on the laundry detergent pack. Please be aware that fabric softeners can damage certain fabrics and their functions. For example, the breathability of water-repellent membranes can be impaired. We do not recommend the use of fabric softeners.

**DRYING**

We do not recommend tumble drying as an everyday solution. It is best to shake & smooth out the fabric, hang up or dry flat. If you do choose to tumble dry, follow the label temperature guide and do not allow the garment to dry completely as the greatest wear and shrinkage risk occurs at the latter stage of drying. Check the garment label carefully as there may be exceptions.

**INDUSTRIAL WASH**

Industrial wash involves a large scale, professional laundry environment, in contrast to home laundry. Most Argyle Performance Workwear garments are suitable for this type of laundry. The ISO 15797 certification deals with industrial washing & drying, temperature, detergents and reactive substances which may be used. We recommend a trial wash at the intended laundry before committing your garments to this. You may need to trial the laundry for 3 to 4 wash cycles to get an accurate understanding of how they perform.

**HIGH-VISIBILITY GARMENTS**

Soiling impairs the visibility of the Hi-Vis garment. For this reason, it is important to wash them frequently and to follow the washing instructions. Never wash Hi-Vis garments with laundry detergent containing bleach, because this impairs the garment’s luminance. Hi-Vis clothing can be stored in a dry, well-ventilated space. Where garments need repairing, this must be done using fabric and thread that meets the garment’s standard.

---

**SIZING SPECIFICATIONS**

Please note: These garments are designed to fit this size person, please allow for clothes to be worn underneath.
